

Crypto-Magique Inc.

Research and Development – Investment and Acquisition :

- C5+ technology: computers, communication, command, control and cryptography;
- C5+ protocol: a resilient network with a recoverable infrastructure that can survive multiple points of failure from threats and attacks from multiple opponents in electronic, industrial, economic, cataclysmic, national, geo, exo-political, peace and war vector scenarios;
- encryption software, hardware, algorithms and the Goddess of Cryptography;
- open source projects and technology – computers, hardware and equipment;
- information storage, processing, retrieval, useful intel in a nutshell;
- microchip, CPU, integrated circuit topography, transistors and associated technology;
- GPU-graphics processing unit, VPU-visual processing unit;
- 3D graphics and solids processing and manufacturing;
- electro-optical and multi-phase engineering transducer technology and phenomena;
- signature and signal processing, recognition and projection technology;
- energy field engineering and augmentation technology;
- remote device and entity telemetry and communication technology;
- visual, colour, acoustic and particle wave technology;
- subliminal technology, research, development, decoding, microwave control signals;
- artistic retro-rendition, symbol recognition and speculative assessment;
- time distortion, atmospheric phenomena and energy field technology;
- language and glyph technology, psychometric, reverse and forward engineering;
- experimental and applied meta, particle and multi-dimensional physics;
- astral time travel, archeo-astronomy, advanced civilization and non-local research;
- psychotronic, material and shape technology, alien artifact, space science projects;
- crystal, mineral, geometric and faceted structures and technology;
- geo, bio and electro-magnetic, metaphysics and energy technology;
- metal, mineral, matrix and geo materials, casting and rapid prototyping;
- polymorphic materials and processing technology;
- investment and acquisitions, development and deployment;
- corporate, securities and transaction management, augment jurisdiction;
- call centre, mail and communications forwarding, augment entity;
- buying group, cheque cashing, money management, augment transactions;
- hard currency, precious metals, materials, minerals, polymer instruments;
- public and private liquid and solid asset management;
- stealth, radar telemetry, communications, command and control;
- private trustee, ownership, control and voting agreements;
- EMP, solar flare, cataclysm proof and other technology;
- pro-active research, development, deployment and counter-measures;
- the news behind the news, meta analysis, counter-measures;
- target tracking, data field analysis, observation, reconnaissance and miscellaneous;
- poutine, cheese, organic food, alternative health and micro breweries;
- Industrial buildings, machinery, infrastructure and advanced manufacturing;
- stealth, omni-directional antennae arrays and communication systems...
- faith, family, freedom, free enterprise, the individual, creative imagination...
- private property, firearms etc., nation state sovereignty, debt free national currency...

hmmm....interesting eh, that's a whole lot more up to speed, right?

You did not notice the exciting adventure code, did you?
